NOTE: We are pleased to accommodate your request for the Model 31 Repeating Shotgun information. The following documentation represents all information available on this model from the Remington Arms Co., Inc.

DO NOT MAKE CHANGES OR ALTERATIONS TO ANY PARTS OF A FIREARM. USE ONLY REMINGTON PARTS. NEVER MAKE AN ADJUSTMENT TO THE TRIGGER, OR CHANGE THE SHAPE OR SIZE OF THE SEAR, SEAR NOTCH, OR OTHER PARTS.
Ten Commandments of Shooting Safety

1. Always keep the muzzle pointed in a safe direction.

2. Firearms should be unloaded when not in use.

3. Don’t rely on your gun’s “safety”.

4. Be sure of your target and what is beyond it.

5. Use correct ammunition.

6. If your gun fails to fire when the trigger is pulled, handle with care!

7. Always wear eye and ear protection when shooting.

8. Be sure the barrel is clear of obstructions before shooting.

9. Do not alter or modify your gun, and have guns serviced regularly.

10. Learn the mechanical and handling characteristics of the firearm you are using.

- Carrier
- Trigger Lock Plunger
- Trigger Plate Pin
- Main Spring Follower
Features to Remember

FASTEST, EASIEST AND SMOOTHER WORKING ACTION OF ITS TYPE. Parts are made and finished to the most exact precision, insuring perfect fit and smooth, dependable operation.

SHORTER FORE-END TRAVEL — Permits faster shooting.

PERFECT BALANCE — Weight evenly distributed, fast pointing, fast handling, “comes up” well—not muzzle light.

POSITIVE EJECTION assured by means of double extractors and sturdily constructed ejector, operated by a coil spring—not a flat spring that is liable to break.

MAGAZINE EASILY UNLOADED — Shells can be removed one at a time from the magazine without being worked through the action and without falling to the ground.

TRIGGER PULL — Light, snappy, permanently adjusted.

THE GRIP IS CORRECTLY SHAPED to permit a firm hold when gun is being fired, eliminating the possibility of absorbing recoil on middle finger.

COIL SPRINGS USED EXCLUSIVELY, minimizing the possibility of broken springs.

SINGLE LOADING FOR TRAPSHOOTING — Easily accomplished by dropping the shell into the opening on the right side of the receiver and closing the action.

POSITIVE FIRE CONTROL — Important safety feature. Trigger must be pulled and released for each shot. Constant pressure on trigger when closing the action will not fire the gun. Gun cannot be fired until action is completely closed and locked.

CROSS-BOLT SAFETY IS POSITIVE — Cannot be jarred out of place by recoil. Conveniently located for quick operation with trigger finger. Not easily moved “on” or “off” by accident.
