AUTOMATIC RIFLE

- Shooting Safety Commandments
- Information
- Instructions for Operation & Care of Rifle
- Components Parts Listing
- Value and Reference Book Listing

NOTE: We are pleased to accommodate your request for the Mohawk 10 C Automatic Rifle information. The following documentation represents all information available on this model from the Remington Arms Co., Inc.
DO NOT MAKE CHANGES OR ALTERATIONS TO ANY PARTS OF A FIREARM. USE ONLY REMINGTON PARTS. NEVER MAKE AN ADJUSTMENT TO THE TRIGGER, OR CHANGE THE SHAPE OR SIZE OF THE SEAR, SEAR NOTCH, OR OTHER PARTS.
Ten Commandments of Shooting Safety

1. Always keep the muzzle pointed in a safe direction.

2. Firearms should be unloaded when not in use.

3. Don’t rely on your gun’s “safety”!

4. Be sure of your target and what is beyond it.

5. Use correct ammunition.

6. If your gun fails to fire when the trigger is pulled, handle with care!

7. Always wear eye and ear protection when shooting.

8. Be sure the barrel is clear of obstructions before shooting.

9. Do not alter or modify your gun, and have guns serviced regularly.

10. Learn the mechanical and handling characteristics of the firearm you are using.
INSTRUCTION FOLDER and PARTS LIST

THE MOHAWK 10C is a 22 caliber automatic rifle. This rifle will load and fire long rifle cartridges only. The autoloading action, after firing, will open and eject the fired cartridge case. The action then closes to cock and reload.

SAFETY — Operated by thumb at rear of receiver cover. Push rearward to SAFE position. RED indicator button will not show in SAFE position. The safety is designed to separate trigger from action when in SAFE position. Trigger in SAFE position is free swinging and cannot fire rifle.

Fig. 1

"FIRE" POSITION

FIRE — Push safety forward to FIRE position (Fig. 1). RED indicator button will show to rear of safety in FIRE position. Pull trigger to fire each round loaded into barrel. After firing, the autoloading action is designed to cock the rifle after the fired cartridge case is ejected.

TO SINGLE LOAD AND COCK RIFLE — Push safety rearward to SAFE position. Turn ejection port in receiver upwards and drop cartridge in recess against closed action (Fig. 2). Pull bolt handle back quickly and release. Cartridge will then drop into action and load forward into barrel.

Fig. 2

THUMBPIECE

TO LOAD MAGAZINE — Clip magazine may be removed by depressing rear of magazine latch thumbpiece (Fig. 2) and pulling clip from bottom of rifle. Load cartridges into magazine. Capacity of magazine is ten (10) cartridges. To reassemble, fit channel opening on back of magazine over end of magazine guide. Push magazine upward until locked in place by magazine latch.

Fig. 3

RANGE SCREW

WINDEAGE SCREW

TO UNLOAD MAGAZINE — Magazine may be easily unloaded after being removed from rifle. Carefully slide cartridges forward and out of magazine.

Caution: After unloading, pull bolt handle back repeatedly to unload live cartridges from action or barrel chamber. Check chamber of barrel from open ejection port to make sure no live cartridge remains in chamber.

The Mohawk 10C is designed to use all the natural qualities of DuPont nylon. This material is self-lubricating and provides frictionless bearing surfaces for the free movement of the autoloading action. Therefore, cleaning and oiling is unnecessary for thousands of rounds of firing.

SIGHTS — May be adjusted for windage or range purposes by movement of rear sight. The front sight is not adjustable, and attached to the barrel by two screws. Coin fitted slots assist the operation of range screw. A stop prevents either screw from being removed from sight.

Fig. 4

RIFLE DISASSEMBLY AND REASSEMBLY — After extended shooting or when rifle is to be laid away for some time, partial disassembly for cleaning is required. Disassemble and reassemble as directed. Cock rifle. Push safety rearward to SAFE position. RED button will not show. Pull out bolt handle. Turn screw cover screw (2), and remove from receiver cover assembly. Slide assembly upwards and remove from rifle. Remove ejector (free fit), from exposed left side of rifle. No further disassembly of rifle is recommended unless replacement of parts is required. Reassemble parts in reverse order.
INSTRUCTIONS FOR

(Read carefully)

WHEN ORDERING PARTS: MODEL NUMBER, PART NUMBER AND PART NAME MUST BE GIVEN. Give also, serial number (if any), and state caliber, gauge and choke needed. Please identify from the component parts, picture or section view. When ordering interchangeable shotgun barrels, please list one separate order form. This will speed up shipment to you.

Cover only one subject in letter or order. Do not order spare parts and give instructions on repair of a gun or guns in the same letter — this delays service.

Please read carefully before making shipment to the Firearms Plant at ILLION, NEW YORK

Please package carefully when shipping firearms to factory. Use plenty of cushioning material to prevent movement of gun or gun parts in package during transit.

Please do not ship gun in a gun case, or special container that must be returned to the factory. The return of your gun or parts will be greatly speeded if properly packaged in a throw-away carton.

All shipments should have forwarding and return address clearly marked on gun package as well as an attached letter.

To further improve service — please attach complete letter of information securely on outside of each package returned to the factory for repairs.

Please do not return gun accessories such as sling straps, quick release swivels; special boots, covers; telescopes; mounts or any special equipment to the factory with the gun shipment.

Give full details of the contents of the shipped state whether complete gun or part. List model name and model number, serial number (if any), and caliber or gauge.

Give full condition of contents — stock and fore-end damage (if any), metal damage (if any), barrel bent or damaged (if any), parts missing, etc. A full description will enable us to more accurately list the needed repairs.

Cover only one subject in letter or order. Do not order spare parts for another gun.

BARREL CLEANING AND CARE — Wipe bore with 22 caliber cleaning patch. Use lightly oiled patch after cleaning. Wire brush if necessary with powder solvent, then wipe clean.

MAINTENANCE — Gun should be checked periodically by a competent gunsmith to ensure proper inspection and any necessary replacement of worn or damaged parts.

IMPORTANT: This gun has been manufactured to Remington specifications and shipped from the factory suitable for use. Remington does not recommend and is not responsible for any alteration or modification to the gun not made by Remington factory personnel, nor the replacement of worn or damaged parts with those not of Remington manufacture.

ORDERING PARTS

to identify from the Parts List or Instruction Folder. See shipping instructions concerning FACTORY SERVICE.

Parts will be furnished for discontinued models as long as the supply is available. We are unable to supply parts for models or repair guns not listed in Complete Line Parts List.

All parts will be shipped as ordered, but since they are made to close dimension, the particular part may require slight adjustment or fitting to assure proper functioning of the arm.

IMPORTANT: Do not combine Part Orders with Gun Service Orders. Please send Part Orders direct to:

REMINGTON ARMS COMPANY, INC.
PARTS DEPT., ARMS SERVICE DIVISION - Ilion, New York 13357

FACTORY SERVICE

and give instructions on repair of a gun or guns in the same letter — this delays service.

THAN — to avoid all possible delay in starting work on your gun or parts, please include in your first order or letter the trouble you wish corrected, any changes you desire, or parts you wish replaced.

If an estimate is required before the work is started, please advise. Otherwise we will proceed with the necessary work and send a statement of the cost to you. In this manner your gun or parts can be reshipped at the earliest possible date.

Unless you specify otherwise, shipments will be made by way of Parcel Post on small packages, Express on larger packages.

Remington gun parts are not interchangeable with those of any other make of gun. For this reason the Remington Arms Company, Inc., cannot service any gun not of our manufacture.

Repairs will be made on discontinued models as long as the supply of parts is available. However, repairs cannot be made for models which are not listed in Complete Line Parts List.

IMPORTANT: Before returning gun for service, ALL LIVE AMMUNITION SHOULD BE REMOVED. Please send repairs direct to:

REMINGTON ARMS COMPANY, INC.
PARTS DEPT., ARMS SERVICE DIVISION - Ilion, New York 13357
